

Dylan Byars | UX Designer & Front-End Developer

📞 321-499-5313 ✉️ dybyux.designs@gmail.com 🌐 www.dybyux.design

UX Designer & Front-End Developer focused on transforming complex systems into intuitive digital experiences. Experienced in user research, information architecture, interaction design, and front-end development. Combines UX strategy with hands-on implementation to turn complex products, content, and workflows into experiences people can easily understand and use.

Work Experience

Storm Bowling Products — UX Researcher & Front-End Developer

- Led a UX research study with 3,000+ participants to uncover user needs and inform Phase 1 of a large-scale redesign strategy for Storm's digital ecosystem.
- Designed and developed interactive product experiences, educational content systems, and marketing campaigns across Storm, Roto Grip, and 900 Global digital properties.
- Built a scalable design system, reusable front-end component library, and interactive content framework using HTML, CSS, and JavaScript that improved visual consistency, accelerated development, and supported long-term content growth.
- Led the redesign of the site's information architecture and navigation to support rapid content expansion, ensuring seamless experiences across desktop and mobile.
- Ran UX research initiatives spanning surveys, interviews, usability testing, and analytics review to identify opportunities in product education, navigation, and content strategy.
- Currently leading a large-scale UX initiative on bowling ball purchasing behavior, informing the development of educational ecosystems, comparison frameworks, recommendation tools, and interactive product experiences.

Education & Academic Projects

Springboard Certificate – UX Design (2021–2022)

Pockets | Personal Finance Organizer — Solo UX Capstone Project

Researched, designed, and prototyped a mobile financial organization app to help young adults organize spending and manage payments. Led generative interviews, created paper prototypes and wireframes, conducted usability testing rounds, and delivered high-fidelity UI focused on reducing financial stress through intuitive categorization and payment workflows.

Savannah College of Art and Design (SCAD) – BFA, User Experience Design · Minor: Graphic Design (2016–2020)

Culinly | AI Cooking Assistant — Indigo Design Award Winner

Primary researcher and strategist for an AI-integrated voice user interface (VUI) system supporting kitchen workflow and accessibility. Led concept mapping, user interviews, and interaction design focused on enhancing hands-free culinary assistance.
